

## ENVIRONMENT & SUSTAINABILITY POLICY

CB Civil & Drainage is firmly committed to reducing our impact on the environment .

To achieve this CB Civil and Drainage commits to:

- Aiming to achieve a level of environmental performance, which goes beyond that required for legal compliance and other requirements to which CB Civil & Drainage subscribes.
- Promoting environmental awareness among all employees of CB Civil & Drainage and those working on our behalf to identify and act upon opportunities to prevent pollution and to minimize any adverse environmental impacts and issues associated with their roles and responsibilities.
- Include environmental considerations through the development and annual review of environmental objectives and targets by Management sourcing and maintaining, up to date records on government regulations and legislation concerning the environment and informing staff of these requirements, and any changes to regulations and legislation, as they are promulgated.
- Conducting our operations in a sustainable manner that ensures work practices give the required consideration to the environment by reducing, reusing, recycling and disposing of waste safely, to minimize pollution and environmental impact.
- Identify and implement ways to improve the efficiency with which we use resources including water, energy, packaging, and chemicals.
- Complying with the environmental policies of the clients for whom we work.
- Implementing rehabilitation practices that limit the potential for erosion and land degradation.
- We will ensure we put controls in place to minimize dust and noise in accordance with industry best practice.
- Protect our river water-ways by not allowing harmful wastewater to enter our storm water drain systems. This is done by ensuring our contractors/employees dispose of all wastewater correctly and where deemed necessary by using an approved liquid waste handler.
